

# How to Make an Origami Cube

**Step One:** Make your paper square

**Step Two:** Fold you paper in half

**Step Three:** Fold the edges to the centre

**Step Four:** Make a crease from c to d by folding point a to meet point b. Then open out to Step 3 again

**Step Five:** Fold Point e (shown in Step 3) under, along the diagonal fold:

**Step Six:** Next the left hand flap will be folded under the right hand flap.

**Step Seven:** Now repeat with the other end, folding the right hand lower flap under the left hand flap, folding along a diagonal crease

**Step Eight:** The finished unit has two flaps and two pockets, make two additional diagonal creases and fold back the flaps as shown:

**Step Nine:** In your groups make six of these units, then assemble them into a cube as follows:

The flap of one unit fits into the pocket of another:
