

Pi Day Craft

Making a Square Envelope Out of Circles

Step 1. Create four circles

Set your compasses to 5cm. (This will give a square envelope with side length 10cm.)

Draw four identical circles and cut them out. If you have coloured paper, choose two different colours and draw two circles in each colour.

Step 2. Fold the circles

Fold each of your four circles in half. Fold each of your four circles in half again, so that they are now in quarters.

Step 3. Glue the circles

Arrange the four circles so they overlap, gluing them **one at a time** into place.

Step 4. Write your greeting

Make a note wishing your friends Happy Pi Day and add it to your envelope.

Step 5. Seal up the envelope

Close up your envelope. You do not need to glue it down.
