

Formula 1 Technicians make the **worlds** most **advanced** cars race their **fastest** this takes **great** skill and **determination**, **Prove your Potential:**

Your Formula 1 car is close to its final pit stop of the race
it is your job to judge the volume of the refuel
if overloaded the car will be too heavy and won't go fast enough
if underloaded it will run out of fuel before the checkered flag...

Cars Efficiency - 12 Miles / Litre
Lap Distance - 3 Miles
Remaining Laps - 30
