

**NASA Astronauts pilot rockets of enormous power into deep space**  
**this takes huge courage and initiative,**  
**Prove your Potential:**

Your Space Shuttle is returning to earth but sustained damage during the mission it now has a faulty rocket booster, you need to lose weight deploy some of your oxygen tanks, you cant get rid of too many or you will run out of air before you land..

Time Before Landing - 200 Minutes  
Number of Tanks - 4  
Amount per Tank - 75 Minutes
